**HAVE A BOLD IDEA?**  
LET'S TAKE IT TO THE NEXT LEVEL

## Bold Patents: A New Name for a New Era

I'm so excited about our new brand, "Bold Patents". It is such a breath of fresh air to finally be focused in our practice area of specialty. Patent Law is what we're known for, it is what we love and enjoy doing for our beloved inventors, business owners, and entrepreneurs. What a perfect time for it too, right? The New Year is fresh in everyone's mind, new goals, aspirations, and dreams – why can't we change too?

What's nice is that we get to hold on to our identity as a firm, and be able to actually stand out even more than we have in the past as THE firm to go to for patents. Our team is already putting plans in place to rally around this focus on Patent Law, dig

in to the recent case law, be in tune with patent examiners' latest guidance, and increase proficiency/understanding of the emerging areas of technology better than before, including: virtual reality and artificial intelligence to drones, robotics, green technology, smart cars/homes, medical devices and therapies and cryptocurrencies, just to name a few! If you can't tell, it's absolutely thrilling to be working on the cutting edge of technology, we couldn't be doing what we're doing at a more exciting time than now.

This year, we're going to be getting the Bold word out more than ever. I'll be teaching at SURF Incubator, co-working spaces, and high schools. In addition, I'll be leading seminars and CLE lectures on

Patent law and the changing landscape for prosecution and litigation. We will continue to develop our Bold Attorney Network further and grow our list of Host firms that Bold IP is Of Counsel to. This network is a powerful way for our firm to serve a broader client base through quality business and transactions law firms across the nation.

I'm so thankful and I feel very blessed and fortunate to have such a great team and great clients. My only hope is that we can continue to grow and serve more clients to help them bring their ideas and inventions into reality.

- Founding Patent Attorney,  
J.D. Houvener
