

Welcome to the ***Bold Bullets Newsletter***

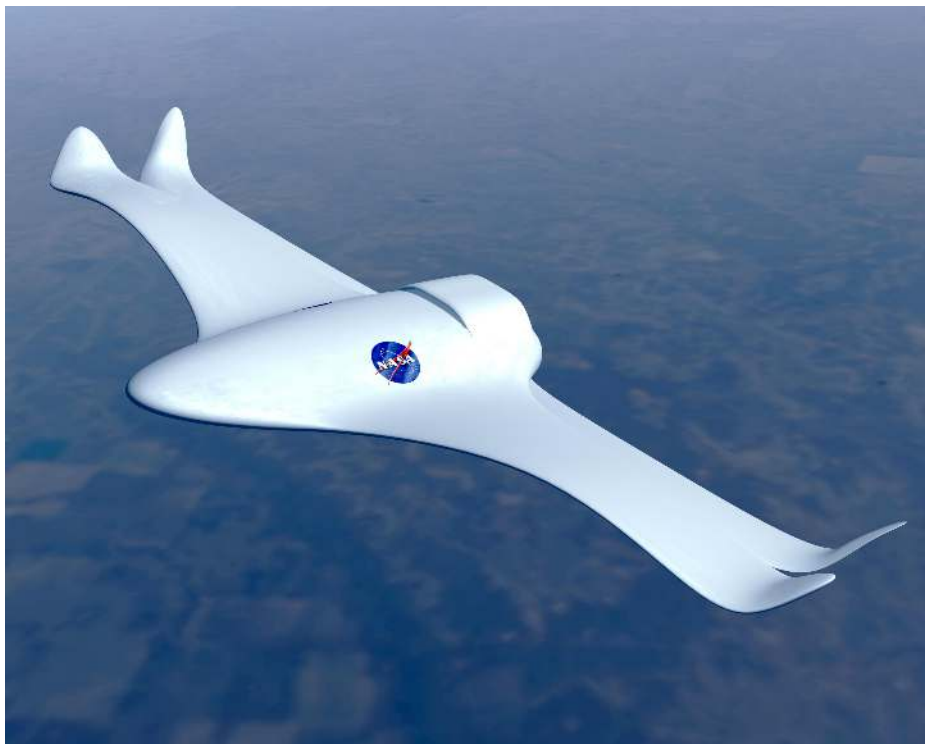

A showcase of *Aerospace, Healthcare, and Software* patent law news

Visit our [website](#) for access to more patent news

Check out the [BOLD Blog!](#) Where Bold puts our own spin on featured articles.

[BOLD Bits!](#) Tune in for quick tips, tricks, and lessons in Intellectual Property.

Aerospace

- [Advancements in computing and advanced composite manufacturing have changed the aerospace industry. The wing has been reinvented with wing warping, or wing morphing. Engineers have successfully developed a wing](#)

that essentially changes its shape by "flexing," increasing efficiency, decreasing weight, and requiring less moving parts!

- Would you like to have your own personal travel aircraft? Soon you may own one! The Martin Aircraft Company plans on making personal jetpacks available for personal use by 2030.

- Date/Time: Fourth Friday of Every Month – 10:00 AM – 12:00 PM (PDT)
- Location: Bold Innovations, [1742 Pacific Ave. #406, Tacoma, WA](#)
- [View Details & RSVP Here](#)

Software

- One of the main issues behind VR is the fact that users are tethered. Whether the users are physically limited by the limitations of the hardware, or bottlenecked by the limitations of their software, VR requires expensive and powerful equipment to create the immersive experiences advertised. Fortunately, there is Furion. Furion is a new software that allows smartphones to overcome their hardware and software limitations, and run untethered VR programs with high quality!
- VR is the future of entertainment. So far, Samsung, Sony, Facebook, and HTC have established themselves in the VR market. Yet, VR enthusiasts are still awaiting other major players to join the market; Nintendo is one of these companies.

Do Nintendo's Recent Trademark Filings Indicate A Game Boy Classic Edition?
